Subject: Urine Samples to McKesson

Sensitivity: Confidential

Valerie,

Both the Lincoln and Phoenix sites are quickly running low on freezer space and would like to ship some of the storage urine to McKesson. I wanted to assure that this could be completed (all contracts in place) and to find out who I should contact in order to inform of shipment. I will also need to know how long it would take to retrieve the samples, if needed. Would you be able to supply this information?

We would like to send urine storage samples from the long term ACCORD study, the short term SCoR study and the long term SCoR study. A very rough estimate of:

Long Term ACCORD	up to 11 time points	99 subjects
Short Term SCoR	9 time points	100 subjects
Long Term SCoR	2 time points	69 subjects

It would be wonderful if we could start shipments by the end of October.

Thanks
Kim

Rec'd 10/10/02.
MDS to contract w/ vendor directly - bill back to PM.

28123 - 2 100 mL aliquots
1 200 mL aliquots

ST SCoR 6 - 2 100 mL aliquots

LT SCoR 6 - 2 100 mL aliquots

Qs - if stored, how do they get it back?
- what is turn around time?
